To,
Vinayak Parida (Area Specialist)
Advanced Maintenance Products,
BHUBANESWER.

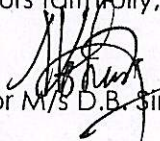

Ref : Observation on the performance of Omega 64 & Zetalube 201.

Dear sir,

With reference to the above we would like to inform you that, we are in receive your letter through Email on Dt.19.08.09. In this connection while using this products in HM-2021, TATA TWL3036, Komatsu W-180A Pay loader in our different site, we observed as follows :

1. While using your product Omega 64 in our Payloader pin bushing area we found that it is lasting for four days whereas other grease remained lasting 6-8 hours as a result of which we saved our time & man power.
2. While using your product Zetalube 201 in our Pay loader popular shaft & high RPM areas we found that it is lasting for seven days whereas other grease remained lasting 3.-4 hours as a result of which we saved our time & man power.
3. Very importantly many mines are not allowing helper due to safety reason as a result we are not being able to greasing the same for which our costly spares are damaged very soon.
4. After using the same our loaders working continuously for 8 hours without any halt for greasing for which we have saved our time and increased working capacity of our Pay loaders.

Thanking you,
Yours faithfully,

(For M/s D.B. Singh)
