

Mr. Ajit Sethi  
Area Manager  
Advanced Maintenance Products  
Bhubaneswar, Orissa

19<sup>th</sup> June 2009

We would like to take this opportunity to thank you for introducing the OMEGA concept of lubrication to our company.

We have successfully used **Zetalube201** lubricant supplied by you and derived good benefits in terms of longer life of lubricant and also ultimate reduction in maintenance cost.

We have used **Zetalube201** for lubrication of bearings of Paper Machine 1\$3, Wire part and Dryer part, where water ingress and temperature shoot up was a frequent problem. Earlier we have used normal EP2 grease and were maintaining a weekly lubrication schedule, and the bearing life was maximum of 6 months.

After using **Zetalube201**, the failure of the Felt roll bearings has drastically come down by 50% due to its water and temperature resistant. The lubrication frequency has been extended up to 6 months and the temperature was within the limit.

We are very much satisfied with the performance of **Zetalube201** and confidently recommend this product to anyone interested on prolonging the life of their machinery and reduce maintenance cost.

Yours faithfully

For JK Paper Ltd.
